**DETAILED ACTION**

1. Appeal Brief filed on August 26, 2004 under 37 CFR 1.192 is entered and considered.
2. Claims 1-63 are the subject of the appeal brief.

***Examiner's Amendment***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David M. Tener on October 19, 2004.

Please amend the claims as follows:

Cancel claim 63.

4. The following is an examiner's statement of reasons for allowance:

Claims 1-62 are allowed.

The present invention is drawn to a catalytic hybridization composition comprising a probe containing at least one probe nucleobase sequence and at least one scissile linkage sequence; an enzyme adapted to cleave said at least one scissile linkage sequence; a nucleic acid target containing at least one target nucleobase sequence associated with said nucleobase sequence of said probe by Watson-Crick bonding to form a multiplex structure; and a hybridization medium containing said probe, said enzyme and said nucleic acid target, wherein at least one of said probe nucleobase sequence and said target nucleobase sequence is double-stranded and is bonded

to the other of the nucleobase sequence or the target nucleobase sequence solely through Watson-Crick base triplets.

Applicants' arguments on the closest prior art rejection under 35 USC 103(a) George Jr. (USPN. 5,451,502) in view of McGavin et al. (J. Mol. Graphics, Vol. 7, pages 218-232, 1989) are fully considered. Applicants argue that the rejection of the instant claims is based on an improper "obvious-to-try" standard of obviousness with no reasonable expectation of success and the theoretical teachings of McGavin reference is a non-enabling art according to In re Payne and argue that there is no motivation to modify the primary reference (George et al.) with the teachings of McGavin et al. to reach the claimed invention with a reasonable expectation of success. These arguments are fully considered and found persuasive upon the suggestions made by (in the appeal brief conference) Gary Benzion (Supervisor, AU 1637), Jeffrey Siew (Supervisor, AU 1642) and Jeffrey Fredman (Primary Examiner, AU 1634). The rejection is withdrawn herein and the claimed invention is found to be non-obvious and novel based on the persuasive arguments.

Thus the instant invention was not taught or obvious over the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
